

API

Enhance productivity through
Integration power processes

4 Key Benefits

- API integration can connect apps and tools without risking efficiency
- Create new API's quickly
- More efficient and strategically future proof
- Best in class Technology that can work with all applications

Our development team have the skillset and the technology at their disposal to build applications that can sync and interface with your systems.

The number of cloud apps used in an enterprise has increased substantially in the last few years. Legacy technology integration issues are now a thing of the past. Our API integration solutions are born in the cloud and can be used to establish a connection between modern-day cloud API's more efficiently.

Our Genesys Cloud Platform puts our agents in the driving seat getting you to your destination quicker and more efficiently. Our agents are presented with the right information each time, every time. Seamlessly working in tandem with your applications, getting the job done.

Waynua use the Genesys Cloud Platform. This is a best in class technology system powering big business API on a global scale.

- We have the people skill set and technology at your disposal
- Security Protocols in place

How it works

It starts with a conversation between the respective IT Departments and where API can fit in with your project.

Any issues or concerns are addressed and we rapidly move to our Development Environment Lab for testing and proof of concept.

Using best in class technology and people we are able to rapidly test and deploy your project.

Key Features

Test Environment

Full test environment to test and deploy

Better changes for the Long term

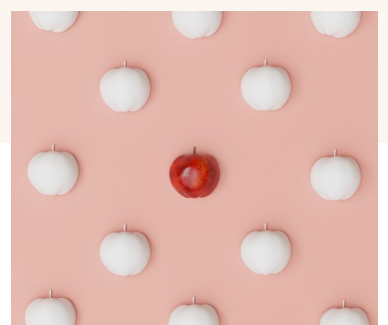

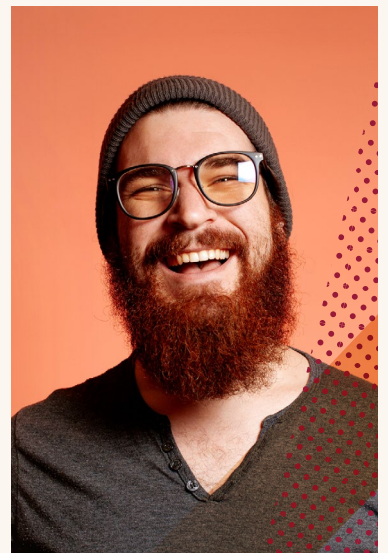

Modern API protocols and Advancements over Legacy Set up

Adaptable and Scalable

AWS, Twilio Integration

Always Evolving

Future Proof your projects

Screen Recording is part of our Screen Sharing and Co-Browse service offering.
